MU-2 Initial Maintenance Training

April 24-28, 2023

Intercontinental Jet Service Corp. (IJSC), Tulsa OK

SimCom MU-2 Maintenance Course will be held at Intercontinental Jet Service Corp. (IJSC), Tulsa OK on April 24-28, 2023. For those who have not attended previously, the course is designed to familiarize students with the overall maintenance program, but goes into depth on how to conduct 100/200/600 hour inspections. The class is 50% in the classroom, and 50% on the shop floor, peeking inside inspection panels and discussing common issues and trends under the guidance of an experienced MU-2 mechanic. While advertised as a maintenance class, a fair number of pilots have attended as well. If any of you are interested, you can see several reviews of the course in this forum. For further info and to register call SIMCOM at 1-800-272-0211 or email at simcom@simulator.com
